Dear Parent

A month ago we celebrated Environment Day; everywhere we could hear why and what of environmental protection. But the voice of concern seems to be ebbing. Celebrating a day is important, it gives impetus to the cause, but what is more important is that it needs to be carried forward with the same spirit.

Protecting the environment is crucial and we all need to give our due to the nature. Margaret Mead once said '**Never doubt that a small group of committed citizens can change the world. It is the only thing that ever has**'. The idea of making DPS-Bopal the Green School was to create socially conscious young men and women, who can take the cause of making the world a better place to live.

As a responsible part of the community, we have always tried to carry out activities which can protect the nature. It ranges from teaching students to save water and electricity to the importance of safely processing e-waste; from celebrating eco-friendly Holi and Diwali to installing solar panels. These efforts fruitfully carried out in school demands a reinforcement at home, to make it a part of the future leaders' lifestyle.

It is my earnest request to all the parents to adopt the concept of division of responsibility in bringing about this change. Divide the area between all the members of the family. One person can be responsible for saving water, one for electricity, and other for saying no to plastics. This reduces the diffusion of responsibility and makes it more likely for the work to be happening.

Let's work as a unit and help make this world a better place.

Best wishes...

Surender P Sachdeva
